Projects manager

Complete management guidance on projects (retail outlets and online clothing and footwear retail stores) from opening and assistance in purchasing, to maintaining current management and analyzing current business data and processes.
- Collecting data and analyze key business indicators and business processes, and also constantly develop and refine new functional reporting requirements from higher management/related departments/third parties;
- Constantly analyze the marketing and product activities of the business for further adjustment and introduction of new metrics necessary for development; - I continuously search for points of growth of the business structure, generate proposals and hypotheses for adjustments and improvements.
- At the moment, I lead a team of 16 people;
- Automated all routine work at retail outlets and focused the work of the line staff on productive sales, which led to a 20% increase in deductions in the long term;
- Translated all project analysis into automatic calculations, constantly improving the quality of reports for the management team, reducing the time of generating reports for the manager at times;
Stack: Excel, SQL, MS PowerPoint and 1C: UNF, 1C: Enterprise
